A question has been given in this question and a statement related to it. Read the passage carefully and review the statement based on it.

In 1870, the composer composer Julius Berne imagined the mineral wealth found in the sea level through his fictional character Capt Nemo. At present, India is moving towards achieving unlimited wealth hidden beneath itself to strengthen its economy. There are various types of minerals, such as copper, nickel, cobalt, iron and other rare elements present in the bottom of the oceans spread across the globe, which can be used in making smartphones and pacemakers. Demand for these resources as a means of technology development and infrastructure has been growing at a globally global level - whose supply is rapidly declining - more and more countries, including India and China, are in the process of building infrastructure. Looking to the oceans for

India, which is Asia's third largest economy, is receiving the green flag for industrial mining, according to the ISA (a UN body related to the management of mining in the oceans). The Indian government has approved a \$ 1 billion for the purchase of mining machines for testing related to the development of mining technology within the oceans. If it succeeds, then India will reach there in the ocean where they are present in 15 times more quantity than all the mineral land. ISA has approved India for mining in the area of 75,000 square kilometers of Indian Ocean, which is 2% of the size of the country.

Statement: India's size is around 75% square kilometers.

Select the most suitable option below.

A-statement is absolutely true.

B-Query is probably true.

C-statement can not be reviewed.

D-statement is completely false.

- (A)  B - (Alternative 2)
- (B)  D - (Alternative 4)
- (C)  A - (Alternative 1)
- (D)  C - (Alternative 3)

Read the given information carefully and answer the questions related to it.

The 6 friends A, B, C, D, E, and F are sitting in a circular area facing the center so that the interval between each of them is equal. (Not necessarily their order is the same.)

- i) A is sitting opposite D, which is the neighbor of E and F.
- ii) E and C are sitting side by side.
- iii) The location of E is not the next to B.
- iv) A is sitting in the second position on the left of B.

Which of the following statements is incorrect as per the above arrangement of seating?

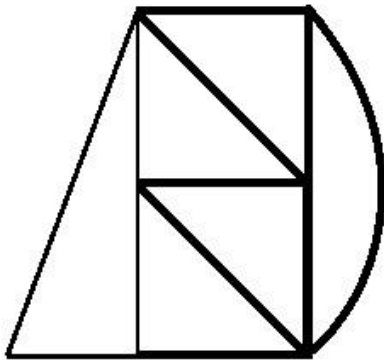

- (A)  C is sitting in the second position on the left of A - (Alternative 1)
- (B)  C and F are sitting in front of each other. - (Optional 4)
- (C)  A person is sitting between E and F - (Alternative 3)
- (D)  F is sitting in the second position on the right of D - (Alternative 2)
