In this question, a paragraph and a statement followed in it have been given. Read the paragraph carefully and vote for a statement based on it.

Amez has admitted to breaking the secrecy of information in the event of its users' name and email id information being disclosed, but has not disclosed any information about its type or scope. The company has not disclosed the total number of users affected by the breach of privacy, but only the affected users have been informed about this technical defect by sending an email. And now, the leading company of these e-commerce is offering gift cards as part of the compensation to affected users of data security. The e-commerce company, which has a head office in Seattle, has given gift cards ranging from \$ 5 to \$ 100 to some users with data violations.

Quoting an email conversation between Amazon and a customer Paul Galgon, a publisher told a publication that the customer offered a promotion certificate of \$ 100 when the customer asked him about how his information came out by calling Customer Service Desk. The company failed to explain to Gangnan some solid reasons to disclose the information, he was given \$ 100 as part of the waiver. Many users have filed their complaints in the customer service desk after the breach of the information. Many people complained to the company claiming to be influenced by data breaches. However, they have not received any response from the company yet. It has been alleged that Amazon's customer service supervisors have been ordered to notify the affected Amazon users about this issue and not give any compensation to the affected customers.

Statement: Mr. Paul did not receive a promotion certificate worth \$ 100 as an apology or found responsible cause for breaking the information.

Choose the right one from the following options

- A statement is definitely true.
- B - The statement is probably true.
- C - The statement can not be determined.
- D - The statement is definitely wrong.

The company has not disclosed the total number of users affected by the breach of privacy, but only the affected users have been informed about this technical defect by sending an email. And now, the leading company of these e-commerce is offering gift cards as part of the compensation to affected users of data security. The e-commerce company, which has a head office in Seattle, has given gift cards ranging from \$ 5 to \$ 100 to some users with data violations.

Quoting an email conversation between Amazon and a customer Paul Galgon, a publisher told a publication that the customer offered a promotion certificate of \$ 100 when the customer asked him about how his information came out by calling Customer Service Desk. The company failed to explain to Gangnan some solid reasons to disclose the information, he was given \$ 100 as part of the waiver. Many users have filed their complaints in the customer service desk after the breach of the information. Many people complained to the company claiming to be influenced by data breaches. However, they have not received any response from the company yet. It has been alleged that Amazon's customer service supervisors have been ordered to notify the affected Amazon users about this issue and not give any compensation to the affected customers.

Statement: The company sent a waiver to all users affected by the data breach.

Choose the right one from the following options

- A statement is definitely true.
  - B - The statement is probably true.
  - C - The statement can not be determined.
  - D - The statement is definitely wrong.
