Directions (4-11): Read the following passage and answer the given questions.

In a **remote** village where schools were a rarity and opportunities even scarcer, one man's **grit** transformed the future of countless children. Forty years ago, Ben Hewitt arrived with a vision—he dreamed of establishing thinking huts, spaces where young minds could flourish despite the lack of formal education. Having grown up in poverty himself, he understood the struggles of children who had no access to learning. Determined to make a difference, he set out to create a nature school for those who could not afford traditional institutions.

For the past 20 years, Ben Hewitt has run this nature school with unwavering dedication. Despite numerous challenges, he ensures that his students receive three years of hands-on education through their surroundings and real-life experiences, followed by a structured fourth-year curriculum. This approach allows them to transition seamlessly into formal education. He strongly believes that knowledge should never be restricted by the absence of resources, and his persistence soon paid off.

Fifty years ago, Ben Hewitt himself had faced the same hardship—his education was cut short due to the lack of higher learning opportunities in his village. He deeply resonated with the struggles of his students and their families. However, schools were reluctant to admit these children, convinced they weren't prepared for the 5th grade. In fact, opposition was so strong that a group was formed to resist the admission of his students into mainstream education.

The dispute eventually reached the courts, where a ruling was made: students would be granted admission only if they could pass the 4th standard exam. To the astonishment of many, every single student from the nature school cleared the test. This victory shattered misconceptions and proved that alternative education could be just as effective. Over the years, 98% of his students have continued their studies, bringing hope to their families and uplifting their village. Many have even returned to teach the next generation, ensuring that the cycle of learning continues.

Today, the impact of Ben Hewitt's work has extended beyond one village—two more villages have adopted his nature school model, with more students enrolling each year.

Though Ben Hewitt's school may not have traditional walls, it is **enveloped** in perseverance and passion. His journey stands as proof that true education is not bound by classrooms but flourishes wherever there is a will to learn and a teacher committed to making a difference. His story is a beacon of hope, demonstrating how one person's determination can transform lives.

Solutions

S1. Ans.(d)

Sol. The correct sequence **DCBA** is chosen because it follows a logical and grammatically correct structure:

- 1. **(D) "even though the food isn't"** This introduces the contrast.
- 2. **(C) "the best, I go there"** Completes the contrast and states the action.
- 3. **(B)** "often because the staff" Adds the reason for going there often.
- 4. (A) "treats me like family" Completes the reason logically.

Thus, the meaningful sentence is:

"Even though the food isn't the best, I go there often because the staff treats me like family."

S2. Ans.(b)

Sol. The correct sequence **CADB** is chosen because it forms a logically structured and grammatically correct sentence:

- 1. **(C)** "since my internet is" Introduces the reason.
- 2. **(A) "down, I can't"** States the problem due to the internet being down.
- 3. **(D)** "access my favorite" Specifies what the speaker can't do.
- 4. **(B) "website right now"** Completes the thought with the object of access.

Thus, the meaningful sentence is:

"Since my internet is down, I can't access my favorite website right now."

S3. Ans.(d)

Sol. The correct answer is: (d) is going to

Solution & Explanation:

The phrase **"going too"** is incorrect because **"too"** means "also" or "excessively," which does not fit the sentence. The correct word should be **"to**", which is a preposition indicating direction.

The correct phrase is **"is going to the store"**, which properly conveys the intended meaning.

Why Other Options Are Incorrect?

1. was went to (Incorrect)

 "Was went" is grammatically incorrect because "went" is already in the past tense and does not need "was."

2. is gone to (Incorrect)

 "Is gone" is incorrect because "gone" is the past participle of "go" and requires "has" or "had" (e.g., "She has gone to the store").

3. was gone to (Incorrect)

 "Was gone" is incorrect in this context because "was gone" means "was not present" rather than actively going somewhere.

4. No replacement required (Incorrect)

• The original phrase **"going too"** is incorrect, so a correction is necessary.

Corrected Sentence:

She is going to the store to buy some groceries and snacks.

S4. Ans.(c)

Sol. The passage states, "Schools were reluctant to admit these children, convinced they weren't prepared for the 5th grade." Option **(d)** is false since the children were eager to continue their education. Option **(e)** is incorrect because the **opposition came from schools, not government restrictions**.

S5. Ans.(c)

Sol. Word: REMOTE (दूरस्थ / परिधीय)

- (a) Distant (दूर)

- *Incorrect.* "Isolated" means being far removed from others, similar to "remote," making it not the antonym.
- (c) Close (पास / समीप)

- **Correct Answer.** "Close" is the opposite of "remote" because it implies nearness, which contrasts with the concept of being distant or far away.
- (d) Faraway (दूर)

- *Incorrect.* This is another word similar to "remote," so it cannot be the antonym.
- (e) Secluded (एकांत / अप्रवेश्य)

- (e) Education should only be for those who can afford it. 🗙 Incorrect
- Ben Hewitt's approach is inclusive, offering education to underprivileged children who otherwise wouldn't have access to it.

Correct Answer:

(d) Knowledge should not be limited by a lack of resources.

S8. Ans.(a)

Sol. Statement **(I)** is incorrect because the passage states that **Ben Hewitt's nature school has been running for 20 years, not over 30 years**. However, there is no indication that his teaching methods have remained completely unchanged.

Sol. The correct answer is (a) has been rising

Solution & Explanation:

The subject of the sentence is **"The demand"**, which is singular. The verb **"have been"** is incorrect because **"have"** is used with plural subjects. The correct verb should be **"has been rising"** to match the singular subject.

12 years ago, let age of A = 2x years And, age of C = $2x \times \frac{50}{100} = x$ years Difference always remains same between age of A and C So, $2x \cdot x = 12$ x = 12 Present age of A = $2 \times 12 + 12 = 36$ years Present age of B = $36 \times \frac{3}{2} = 54$ years

Let speed of train A be 5x m/s. So, speed of train B = 6x m/sATQ - $(6x - 5x) = \frac{400+480}{44}$ $x = \frac{880}{44}$ x = 20So, speed of train B = $6x = 6 \times 20 = 120 \text{ m/s}$
