Correct Marks: 1 Wrong Marks: 0.25

The following are the qualifications required for selection to the Administrative Officer post in a reputed education institution:

- (A) The candidate must have completed an MBA (Master in Business Administration) course with a minimum of 60% marks.
- (B) The candidate must have passed the selection test with a minimum of 75% marks.
- (C) The candidate must have secured at least 75% marks in the interview.
- (D) The candidate must not be less than 25 years of age and more than 35 years of age as on 1 April 2019.

If the candidate satisfies all the aforementioned criteria EXCEPT:

- (I) (A), but is a Certified Administration Professional (CAP) with 50% marks, the case is to be referred to the Director of the Recruitment Committee.
- (II) (B), but has at least 2 years' experience of working as an Administrative Assistant and above, the case is to be referred to the Chairman of the Recruitment Committee.

Based on the above information, decide the appropriate course of action for the following candidate. You are not to assume anything other than the given information.

Sumana Chatterjee has completed her MBA course with 76% marks. She has been working as an Administrative Assistant in a private company since December 2016. She has scored 72% marks in the selection test and 75% marks in the interview. Her date of birth is 27 November 1993.

- 1. * The candidate is to be selected.
- 2. * The candidate is not to be selected.
- 3. * The case is to be referred to the Director of the Recruitment Committee.
- 4. The case is to be referred to the Chairman of the Recruitment Committee.

Read the following passage and answer the questions given after it.

Hunting has been a major cause of the decline in elephant populations. Elephants became prized trophies for big-game hunters after Europeans arrived in Africa. More recently, and more devastatingly, hunters have slaughtered elephants for their ivory tusks. The ivory trade became a serious threat to elephants in the 1970s.

A sudden oil shortage caused the world economy to collapse, and ivory became more valuable than gold. In fact, ivory has been called "white gold" because it is beautiful, easily carved, durable, and pleasing to the touch. Most of the world's ivory is carved in Japan, Hong Kong, and other Asian countries, where skilled carvers depend on a supply of ivory for their livelihoods.

Hunting elephants is no longer legal in many African countries, but poaching was widespread until very recently. For many the high price of ivory, about \$100 a pound in the 1980s, was too tempting to resist. Local people often had few other ways to make a living, and subsistence farmers or herders could make more by selling the tusks of one elephant than they could make in a dozen years of farming or herding.

As the price of ivory soared, poachers became more organized, using automatic weapons, motorized vehicles, and airplanes to chase and kill thousands of elephants. To governments and revolutionaries mired in civil wars and strapped for cash, poaching ivory became a way to pay for more firearms and supplies.

Poaching has caused the collapse of elephants' social structure as well as decimating their numbers. Poachers target the biggest elephants because their tusks are larger. They often kill all the adults in the group, leaving young elephants without any adults to teach them migration routes, dry-season water sources, and other learned behavior. Many of Africa's remaining elephant groups are leaderless subadults and juveniles.

Questions: No

Question Numbers: (156 to 160)

Question Label: Comprehension

Read the following passage and answer the questions given after it.

Climate change is a long-term shift in global or regional climate patterns. Often climate change refers specifically to the rise in global temperatures from the mid 20th century to the present.

Earth's climate has changed many times. For example, fossils from the Cretaceous period (144 to 65 million years ago) show that Earth was much warmer than it is today. Fossilized plants and animals that normally live in warm environments have been found at much higher latitudes than they could survive at today. For instance, breadfruit trees, now found on tropical islands, grew as far north as Greenland.

Earth has also experienced several major ice ages — at least four in the past 500,000 years. During these periods, Earth's temperature decreased, causing an expansion of ice sheets and glaciers. The most recent Ice Age began about 2 million years ago and peaked about 20,000 years ago. The ice caps began retreating 18,000 years ago. They have not disappeared completely, however. Their presence in Antarctica and Greenland suggests the Earth is still in a sort of ice age. Many scientists believe we are in an interglacial period, when warmer temperatures have caused the ice caps to recede. Many centuries from now, the glaciers may advance again.

Climatologists look for evidence of past climate change in many different places. Like clumsy criminals, glaciers leave many clues behind them. They scratch and scour rocks as they move. They deposit sediment known as glacial till. This sediment sometimes forms mounds or ridges called moraines. Glaciers also form elongated oval hills known as drumlins. All of these geographic features on land that currently has no glaciers suggest that glaciers were once there.

Scientists also have chemical evidence of ice ages from sediments and sedimentary rocks. Some rocks only form from glacial material. Their presence under the ocean or on land also tells scientists that glaciers were once present in these areas.

नीचे दिये गए गद्यांश को पढ़कर पूछे गये प्रश्नों के उत्तर दीजिए।

वर्तमान युग में पत्रकारिता के प्रति इतनी रुचि पैदा हो गई है कि सुबह पत्रों से ही दिनचर्या आरंभ होती है। समाचार-पत्र तो जीवन में इस प्रकार घुल मिल गया है कि इसके बिना हम किसी भी दिन के शुभारंभ की कल्पना ही नहीं कर सकते। पत्रकारिता आज के जागरूक नागरिक का अभिन्न अंग हो गयी है। पत्र आते ही शिक्षित नागरिक राजनीति, नौकरी, सिनेमा, खेलकूद, पुस्तक समीक्षा, नये फैशन आदि पर नजर डालता है और ये सूचनाएं समाज के प्रति व्यक्ति के लिए अनिवार्य संसाधन बन गयी हैं। पत्रकारिता में जीवन के यथार्थ को अधिकाधिक रूप से समाज को प्रभावित करने की जो क्षमता होती है यदि उसमें पूर्ण सच्चाई हो तो क्षमता को और भी बल मिलता है और अनिवार्यत: समाज उससे प्रभावित होता है।

नीचे दिये गए गद्यांश को पढ़कर पूछे गये प्रश्नों के उत्तर दीजिए।

भारतवर्ष की सबसे बड़ी विशेषता यहाँ व्याप्त विविधता में एकता है और यह विविधता समाज के हर स्तर पर देखी जाती है। इन्हीं विशेषताओं में ही भाषायी विविधता का भी अपना एक अलग ही स्वरुप है। यहाँ जितनी विविधता भाषाओं की है उतनी ही विविधता मानवीय संस्कृतियों की भी है। परंतु इन सबके बीच सबसे खास बात यह है कि अलग-अलग राज्यों और विभिन्न संस्कृतियों का प्रतिनिधित्व करती सभी अलग-अलग भाषाओं को आपस में जोड़ने का काम करती है हिन्दी भाषा। भारत की कई भाषाओं के मध्य राजभाषा, संपर्क भाषा और राष्ट्रभाषा के रूप में अपना स्थान बनाने वाली एक मात्र भाषा हिन्दी ही है। भाषा मनुष्य की मानसिक और बौद्धिक स्वतन्त्रता की सूचक होती है साथ ही भाषा से उत्पन्न होने वाली शिक्त हमारी संस्कृति की गितशीलता की पहचान का परिणाम भी है।
