Read the passage and answer the question given below it:

Last month, the Event Horizon Telescope (EHT) collaboration showed the world the 'unseeable': the very first image of a black hole. Of course, the black hole itself cannot be seen, because light cannot escape its intense gravitational attraction. The so-called event horizon that envelops the black hole is the point of no return and any object transgressing this boundary is lost. Just outside is a region where a photon (light quantum) can orbit the black hole without falling in. This is called the 'last photon ring', and this is what the EHT imaged, seeing in effect the silhouette of a black hole. Visual proof of the existence of black holes comes a century after they appeared in scientific literature. In a collaborative effort, eight telescopes around the world were used for the experiment. The challenges included making each observe the same broad range of wavelengths around 1.3 mm and having precise atomic clocks at each location, so the data could be combined.

A black hole marks the end of space time as commonly understood, and nothing that enters it can escape from the tremendous gravitational attraction. However, this is no real danger, as black holes are located at distances that humans do not have the power to scale. The EHT set out to image two candidate supermassive black holes — Sagittarius A, which is 26,000 light years from the earth, at the centre of the Milky Way, and another which is 55 million light years away at the centre of the Messier 87 galaxy in the Virgo galaxy cluster. But the first image was of the more distant one. The very long baseline interferometry technique linked radio dishes of telescopes across the world to produce a virtual telescope the size of the earth. This was needed to obtain the high resolution required for this measurement. Combining data from telescopes, each with different characteristics, was a separate challenge. Cutting-edge developments from computer science related to image recognition were used. As Katie Bouman, Assistant Professor at the California Institute of Technology, who led the efforts to develop an algorithm to put the data together and create the image, said in a talk, projects such as the EHT succeed owing to interdisciplinary expertise that people bring to the table. This experiment endorses the diversity of collaboration just as much as it does unrelenting patience and good faith in the power of science and reason.

Read the passage and answer the question given below it:

Ram Sethu, also known as Sethusamudram and Adam's Bridge is a stretch of limestone shoals that runs from Pamban Island near Rameshwaram in South India to Mannar Island off the northern coast of Sri Lanka. It formed part of a land bridge that joined Sri Lanka to the continent of Asia during the last ice age.

Hindu believers hold it as the structure that Lord Rama and his army of apes and monkeys built to reach demon king Ravana's Lanka.

There are different geological and religious theories behind the origin of the bridge, one of which even says that Sri Lanka was a part of Indian landmass and that the calcareous rectangular blocks are testimony of Lanka breaking away from the mainland about 1,25,000 years ago.

It was the site of the proposed Sethusamudram Shipping Canal Project by the Government of India for dredging the entire strait to make it navigable by large ships and create fishing and shipping harbours in the coastal areas because today, ships bound for India's eastern coast have to circle around the entire island of Sri Lanka to reach Tuticorin, Chennai, Vizag, Paradip and other ports.

It has been claimed that that the successful completion of the project would cut travelling by about 350 nautical miles and will save 10 to 30 hours' sailing time. It will bring down shipping costs and add to India's exchequer in the form of transit fees.

As the Hindu believers hold it as the structure that Lord Rama and his army of apes and monkeys built, thus because of this religious belief, the project has been condemned and opposed by a wide spectrum of the Indian people.

Environmentalists claim that the completion of this project would destroy and destabilise the flora and fauna in the nearby locations. They have also claimed that most modern ships carry much higher loads but only ships with tonnage up to 30,000 tonnes would be able to use the canal.

It has been claimed that that the successful completion of the project would cut travelling by about 350 nautical miles and will save 10 to 30 hours' sailing time. It will bring down shipping costs and add to India's exchequer in the form of transit fees.

As the Hindu believers hold it as the structure that Lord Rama and his army of apes and monkeys built, thus because of this religious belief, the project has been condemned and opposed by a wide spectrum of the Indian people.

Environmentalists claim that the completion of this project would destroy and destabilise the flora and fauna in the nearby locations. They have also claimed that most modern ships carry much higher loads but only ships with tonnage up to 30,000 tonnes would be able to use the canal.

निम्नलिखित गद्यांश को पढ़कर उसके सही उत्तर दीजियेI

नदी तट पर घुमते हुए मैंने देखा की दिवस का अवसान होने जा रहा था और पूरा गगन लोहित हो चला था। तरुशिखाओं पर किरणें शोभायमान थीं और कमलिनी कुलवल्लभ प्रतीची उन्मुख थे। पिक्षयों का कलरव मनमोहक था और मैं ख़ुशी-ख़ुशी मित्र-मिलान की चाह की कल्पनाओं में खोया-सा चला जा रहा था। मैं रोमांचित था और आलिंगबद्ध होने की कामना लिए चला जा रहा था। कभी प्रकृति सौंदर्य और सभी मित्र, दोनों ही मुझ पर हावी थे, पर मन में यही था की आज दूध का दूध और पानी का पानी हो जाएगा।

निम्नलिखित गद्यांश को पढ़कर उसके सही उत्तर दीजियेI

मैं प्रतिदिन प्रातः भ्रमण के लिए हूँ। वहीं उद्यान में मुझे एक 60 -65 वर्ष के सज्जन मिलते हैं, जो हृष्ट-पुष्ट हैं विनोदी स्वभाव के हैं। मैंने उनसे उनके स्वास्थ्य के बारे में पूछा तो उन्होंने कहा कि मैं तुम्हें स्वस्थ रहने का एक सूत्र बताता हूँ। उन्होंने सूत्र बताया कि 'पाँव गरम, पेट नरम, सर ठंडा। आए वैद्य तो मारो डंडा।' उन्होंने सूत्र के प्रत्येक भाग को स्पष्ट किया और मै सूत्र सुनकर फूला न समाया। दरअसल, अच्छी बातों की नींव तुरंत दाल लेनी चाहिए। यह सोचकर धीरे-धीरे में भी सूत्र का अनुपालन करने लगा। आजकल हम लोगों में दांत काटी रोटी है।
