Read the passage and answer the questions that follow.

Businesses use the Internet for a variety of reasons. Some businesses are virtual – they have no bricks and mortar locations, and conduct all of their selling activities online. Consumers love the convenience that the Internet provides – we can shop at any hour and on any day. Most virtual businesses are never closed. However, consumers also love instant gratification – we want it now, or as soon as possible. Many consumers are willing to pay more for speedy delivery of their orders. Virtual businesses rely heavily on information and transportation technology to get their goods and services to consumers as quickly and efficiently as possible. The process of delivering items to consumers is called fulfillment.

Amazon.com is one of the earliest and largest examples of virtual retailers. People seek out these sites in order to buy things. Amazon sells downloads of music and books at its site for use in various electronic devices. Amazon also sells a wide variety of physical objects for delivery to consumers' homes. It also acts as a fulfillment service for many other businesses. These businesses have decided to contract for Amazon's services rather than bear the cost of these capacities on their own. Similarly, small-scale sellers can tap into the resources that eBay provides so that those who sell only occasionally can reach a national or global market.

Other businesses rely primarily on physical locations for their sales. They may use their websites to advertise new products and specials to generate traffic for their stores. Their websites provide locations, directions and hours for those stores. If the business is a restaurant, its website will offer menus and perhaps a means of reserving a table.

Read the passage and answer the questions that follow.

Businesses use the Internet for a variety of reasons. Some businesses are virtual - they have no bricks and mortar locations, and conduct all of their selling activities online. Consumers love the convenience that the Internet provides - we can shop at any hour and on any day. Most virtual businesses are never closed. However, consumers also love instant gratification - we want it now, or as soon as possible. Many consumers are willing to pay more for speedy delivery of their orders. Virtual businesses rely heavily on information and transportation technology to get their goods and services to consumers as quickly and efficiently as possible. The process of delivering items to consumers is called fulfillment.

Amazon.com is one of the earliest and largest examples of virtual retailers. People seek out these sites in order to buy things. Amazon sells downloads of music and books at its site for use in various electronic devices. Amazon also sells a wide variety of physical objects for delivery to consumers' homes. It also acts as a fulfillment service for many other businesses. These businesses have decided to contract for Amazon's services rather than bear the cost of these capacities on their own. Similarly, small-scale sellers can tap into the resources that eBay provides so that those who sell only occasionally can reach a national or global market.

Other businesses rely primarily on physical locations for their sales. They may use their websites to advertise new products and specials to generate traffic for their stores. Their websites provide locations, directions and hours for those stores. If the business is a restaurant, its website will offer menus and perhaps a means of reserving a table. Read the passage and answer the questions that follow.

What if India had not invented the zero? Perhaps computers would not have seen the light of the day and the world would not be connected through information technology. With the Digital India programme, India may have an opportunity to inspire and transform the world yet again.

Will it be able to transform the country into a digitally empowered society and a knowledge economy using a gamut of electronic services, applications, products and devices? Time will tell. But imagine farmers in remote villages using mobile phones to find out the right price of their food grains, or to check for monsoon updates. Imagine modern cities whose transport systems, healthcare facilities and civic services are controlled through gadgets and apps.

All this may seem like a distant dream, but with technology galloping away into the future, you have to jump on to it and take control of the reins, now. Smart cities are springing up across the globe and the idea of Internet of Things (IOT), where all devices at home or in office are connected to the internet and are able to speak to each other, are being developed as we speak.

This power of technology, however, has to be delivered to every citizen of the country. Digital accessibility is a prerequisite to, and a mandatory goal of, the idea of Digital India. A digital network, which will form part of this mammoth effort, will belong to the people, just like roads, railways and power lines.

भिक्तकाल के किव तमाम विसंगितयों से टकराते हुए ये न सिर्फ उसका प्रतिकार करते
हैं बिल्कि उसका समाधान भी सुझाते हैं जो आज अधिक समीचीन है। रंगभेद, नस्लभेद
जैसे अनेक भेद जो मनुष्य को मनुष्य नहीं समझते, आज भी वर्तमान समय में व्याप्त हैं।
यह किव उस समय 'जाति-पाति पूछै निहंं कोई' विखकर उसका उत्तर देते हैं। कबीर
का मनुष्य के धरातल पर आकर किवता करना और मानव मात्र के कल्याण की बात
करना उनकी किवता का उद्देश्य रहा है। तुलसी की लोकमंगल की अवधारणा और
परिहत की बात आज तत्कालीन समय से ज्यादा प्रासंगिक हो उठी है। जब इंच-इंच
जमीन और अपने स्वार्थ के लिए लोग भाई, पुत्र पिता के संबंधों का खून कर देते हैं तब
तुलसी, राम और भरत के सत्ता के तिरस्कार को केवल भ्रातृ प्रेम कारण बताते हैं।

नीचे दिये गए गद्यांश को पढ़कर पूछे गये प्रश्नों के उत्तर दीजिए।
सच्ची यथार्थदृष्टि वस्तुनिष्ठ होती है परंतु वह संकलनात्मक नहीं होती है। यथार्थवादी
लेखक सत्य को ब्योरेवार प्रस्तुत करता है परंतु उसे मात्र फोटोग्राफिक नहीं बना देता।
यथार्थवादी रचनाकार इस अनंत रूपात्मक जगत तथा उसके समूचे विस्तार को पैनी
नजरों से देखता है। वह व्यापक सामाजिक जीवन में प्रविष्ट होकर नाना प्रकार की
स्थितियों तथा चरित्रों से साक्षात्कार करता है, अनुभवों की एक मूल्यवान समष्टि का
स्वामी बनता है, किंतु सारी बातों को फोटोग्राफिक शैली में ज्यों का त्यों प्रस्तुत नहीं
कर देता। वह सारी घटनाओं तथा पात्रों को सामाजिक जीवन से प्राप्त यथार्थ अनुभवों
की खराद पर चढ़ाता है, उन्हें तराशता है, नुकीला बनाता है और अपनी कृति के
अंतर्गत उनकी कलात्मक नियोजना करता है। इसलिए यथार्थ के चिंतकों ने रचनाकार
की दृष्टि को पात्रों तथा परिस्थितियों के भीतर व्यंजित होने की बात कही है।
