Read the following passage and answer the questions given below:

They say that crime doesn't pay. But for the authors who dabble in the art of crafting crafty crooks and the brilliant (and, at times, maudlin) detectives who end up catching them, crime most definitely does pay. It pays so well that entire regions (Scandinavia being a prime example) get transformed into giant crime fiction-producing factories.

It pays so well that icons are created – both, of the fictional detectives and their very real makers. Sherlock Holmes and Arthur Conan Doyle, respectively, being a case in point. In India, only two have truly reached such an iconic status – Satyajit Ray with Feluda and Sharadindu Bandyopadhyay with Byomkesh Bakshi – but there is no need to despair. There is time, still.

Author Ashwin Sanghi, who has co-written two crime fiction novels based in India with James Patterson, believes that it is all a matter of time. And that the genre will soon be as popular as romance and mythology in India. "We have to understand the fact that commercial fiction writing is only ten years old in India. We've not had the necessary amount of time to evolve. I believe in the next two or three years, it will become one of the dominant categories in the bestseller space," says Sanghi.

Anita Nair, who has delved into the disturbing world of crime with 'Cut Like Wound' and 'Chain of Custody', too believes that the genre is in its early stages in India. "Crime fiction is still in its primary stage in India," she says. "The chances of it going global like Scandinavian noir will happen when characters and issues written about have greater dimensions than just the usual run-of-the-mill crime scene. We will have to wait and see if that will happen."

Read the passage and answer the questions that follow.

Data science is a detailed study of the flow of information from colossal amounts of data present in an organisation's repository. It involves obtaining meaningful insights from raw and unstructured data, which is processed through analytical, programming and business skills.

In a world that is increasingly becoming a digital space, organisations deal with zetta and yottabytes of structured and unstructured information every day. Evolving technologies have enabled better cost savings and smarter storage spaces to store critical data.

In the current industry, there is a huge need for skilled, certified data scientists. They are among the highest-paid professionals in the IT industry. According to Forbes, "the best job in America is as a Data Scientist with a median base salary of \$110,000" annually. Only a few people have the capability to process it and provide valuable insight out of it. Furthermore, looking at the huge requirement that is increasing at a continual pace, McKinsey has predicted that there will be a 50% gap in the supply of data scientists versus its demand in the upcoming years. In the recent years, there has been a huge growth in the field of Internet of Things (IoT), due to which 90% of the data that is present in the current world has been generated. Every day 2.5 quintillion bytes of data is generated, and it accelerates with the growth of IoT.

Read the passage and answer the questions that follow.

Data science is a detailed study of the flow of information from colossal amounts of data present in an organisation's repository. It involves obtaining meaningful insights from raw and unstructured data, which is processed through analytical, programming and business skills.

In a world that is increasingly becoming a digital space, organisations deal with zetta and yottabytes of structured and unstructured information every day. Evolving technologies have enabled better cost savings and smarter storage spaces to store critical data.

In the current industry, there is a huge need for skilled, certified data scientists. They are among the highest-paid professionals in the IT industry. According to Forbes, "the best job in America is as a Data Scientist with a median base salary of \$110,000" annually. Only a few people have the capability to process it and provide valuable insight out of it. Furthermore, looking at the huge requirement that is increasing at a continual pace, McKinsey has predicted that there will be a 50% gap in the supply of data scientists versus its demand in the upcoming years. नीचे दिये गए गद्यांश को पढ़कर पूछे गये प्रश्नों के उत्तर दीजिए।

कहानीकार कहानी में चित्रित घटना एवं परिवेश के माध्यम से समाज की जीवंत सञ्चाई को उद्घाटित करता है। साथ ही समाज में क्रियाशील विभिन्न सामाजिक संगठनों की समसामयिक प्रासंगिकता और उसके सामाजिक अवदान की विवेचना करता है। लेखक की पैनी दृष्टि, उसकी संवेदनशीलता गहरे स्तर पर अपने परिवेश से जोड़ती है। आजादी के बाद देश की सामाजिक संरचना में अभूतपूर्व परिवर्तन हुआ जिसका प्रभाव धर्म, राजनीति, विवाह, परिवार तथा सरकारी, गैरसरकारी, सामाजिक संस्थाओं में परिलक्षित होता है। देश की भ्रष्ट राजनीति के कारण समाज में भ्रष्टाचार, बेरोजगारी, गरीबी, अशिक्षा और परिवारिक बिखराव-बदलाव आदि जैसी अनेक समस्याएँ उद्दीम हुई हैं। देश की स्वाधीनता एक विभाजन रेखा है जो समाज और साहित्य को देखने का सारा दृष्टिकोण बदल देती है। इसलिए इस दौर में साहित्यकारों ने सामाजिक संस्थाओं की तत्कालीन भूमिका का बड़ी गहराई से अन्वेषण अपनी रचनाओं में किया है।
