Read the following passage and answer the questions that follow.

Bartering is trading services or goods with another person when there is no money involved. This type of exchange was relied upon by early civilizations. A barter system is an old method of exchange. This system has been used for centuries and long before money was invented. People exchanged services and goods for other services and goods in return. Today, bartering has made a comeback using techniques that are more sophisticated to aid in trading; for instance, the Internet. In ancient times, this system involved people in the same area, however today bartering is global. The value of bartering items can be negotiated with the other party. Bartering doesn't involve money which is one of the advantages. You can buy items by exchanging an item you have but no longer want or need. Generally, trading in this manner is done through Online auctions and swap markets. The history of bartering dates all the way back to 6000 BC. Introduced by Mesopotamia tribes, bartering was adopted by Phoenicians. Phoenicians bartered goods to those located in various other cities across oceans. Babylonians also developed an improved bartering system. Goods were exchanged for food, tea, weapons and spices. At times, human skulls were used as well. Salt was another popular item exchanged. Salt was so valuable that Roman soldiers' salaries were paid with it. In the Middle Ages, Europeans travelled around the globe to barter crafts and furs in exchange for silks and perfumes. Colonial Americans exchanged musket balls, deer skins, and wheat. When money was invented, bartering did not end, it became more organised.

Read the following passage and answer the questions that follow.

Augmented reality is an enhanced version of reality where live direct or indirect views of physical real-world environments are augmented with superimposed computer-generated images over a user's view of the real-world, thus enhancing one's current perception of reality. The origin of the word 'augmented' is augment, which means to add or enhance something. In the case of Augmented Reality (also called AR), graphics, sounds and touch feedback are added into our natural world to create an enhanced user experience.

Unlike virtual reality, which requires you to inhabit an entirely virtual environment, augmented reality uses your existing natural environment and simply overlays virtual information on top of it. As both, virtual and real worlds harmoniously co-exist, users of augmented reality experience a new and improved natural world where virtual information is used as a tool to provide assistance in everyday activities.

Applications of augmented reality can be as simple as a textnotification or as complicated as an instruction on how to
perform a life-threatening surgical procedure. They can
highlight certain features, enhance understandings, and
provide accessible and timely data. Cell phone apps and
business applications by companies using augmented reality
are a few of the many applications driving augmented reality
application development. The key point is that the
information provided is highly topical and relevant to what
you want or what you are doing.

Read the following passage and answer the questions that follow.

Augmented reality is an enhanced version of reality where live direct or indirect views of physical real-world environments are augmented with superimposed computer-generated images over a user's view of the real-world, thus enhancing one's current perception of reality. The origin of the word 'augmented' is augment, which means to add or enhance something. In the case of Augmented Reality (also called AR), graphics, sounds and touch feedback are added into our natural world to create an enhanced user experience.

Unlike virtual reality, which requires you to inhabit an entirely virtual environment, augmented reality uses your existing natural environment and simply overlays virtual information on top of it. As both, virtual and real worlds harmoniously co-exist, users of augmented reality experience a new and improved natural world where virtual information is used as a tool to provide assistance in everyday activities.

Applications of augmented reality can be as simple as a textnotification or as complicated as an instruction on how to
perform a life-threatening surgical procedure. They can
highlight certain features, enhance understandings, and
provide accessible and timely data. Cell phone apps and
business applications by companies using augmented reality
are a few of the many applications driving augmented reality
application development. The key point is that the
information provided is highly topical and relevant to what
you want or what you are doing.

नीचे दिये गए गद्यांश को पढ़कर पूछे गये प्रश्नों के उत्तर दीजिए। किव को कालद्रष्टा या युगद्रष्टा कहा जाता है। आज इक्कीसवीं सदी के पूर्वार्द्ध में भी हम जाति-पाति, वर्ण भेद, वर्ग भेद से ऊपर नहीं उठ पाये हैं। उसी की मैली-कुचली रुग्ण हो चुकी परंपरा के पोषक बने हुए हैं। इन सब के खतरों से महाकिव कबीर भली-भाँति परिचित थे। वह जानते थे कि ये वही बुराइयाँ हैं जो समाज को दीमक की तरह खोखला करने को आतुर हैं और इस संकट को पहचानते हुए वह एक रास्ता सुझा रहे थे जिस पर चलकर हम मनुष्यता की उस भावाभूमि को प्राप्त कर सकते हैं। जहाँ पर जाति-पाँति, छोटा-बड़ा, ऊँच-नीच, कर्मकांड सभी खत्म हो जाते हैं और इंसानियत ही बची रहती है। मानव मात्र का एक ही धर्म बचा रहता है इंसानियत। मानवता के इसी समाज की कल्पना कबीर कर रहे थे।

नीचे दिये गए गद्यांश को पढ़कर पूछे गये प्रश्नों के उत्तर दीजिए।

भारतेंदु का उदय हिन्दी के उद्धारकर्ता के रूप में हुआ। सन 1873 ई० में भारतेंदु ने 'कालचक्र' नामक अपनी पुस्तिका में नोट किया 'हिन्दी नये चाल में ढली'। यह कथन हिन्दी भाषा के लिए युगानुरूप कथन था क्योंकि भारतेंदु के समय व स्वयं भारतेंदु के द्वारा ही हिन्दी अपने नये आयाम विकसित कर रही थी या यूँ कहें खड़ी बोली गद्य के प्रसार में आने के साथ-साथ हिन्दी में कई नवीन विधाएँ अपने शैशव काल की ओर अग्रसर हो रही थीं। भारतेंदु ने न केवल हिन्दी भाषा का परिमार्जन किया अपितु नाटक, यात्रा साहित्य, आलोचना आदि गद्य विधाओं की शुरुआत की। दरअसल यही वह विधाएँ थीं जो हमारी भावना व सच को सही मायनों में प्रतिबिंबित कर सकती हैं। आचार्य शुक्ल ने भी स्वीकार किया कि 'हमारे साहित्य को नये-नये विषयों की ओर प्रवृत्त करने वाले हरिश्चंद्र ही हुए।'
