Read the passage to answer the questions that follow.

It is often said that a sports star will die twice, the first time at retirement. For elite athletes who have dedicated their lives to sport, what happens when your time comes to an end? If you aren't an athlete, then who are you?

Elite athletes train extensively for years, in many cases, consuming the majority of their young lives, often making extensive personal sacrifices in order to pursue their dreams of glory. These may include making huge financial sacrifices, moving away from family to train full-time in academies, calling time on their academic studies and sacrificing personal or romantic relationships. For many athletes, retirement is a concept that they do not wish to think about in great detail. However, whether they have achieved Olympic glory or failed to reach the pinnacle in their sport that they had aspired to, all athletes' careers will eventually come to a close, whether this is through age, injury or exhaustion.

However, what happens to these athletes once they leave the days filled with rigorous training, the extensive time spent travelling and the buzz and adrenaline of competing? This is the time in their lives where they may be susceptible to depression. Olympic Champion cyclist, Victoria Pendleton, expressed her extreme relief of retirement after the London Games, citing that she couldn't wait to go on to new ventures in her life and was much happier now that the pressure of competing was no longer a burden. However, not all athletes will enter retirement with such ease and willingness; many will struggle with adapting to a "regular life" where they are no longer in the limelight and perhaps, in their eyes, become forgotten members of society.

Sport career termination induces dramatic changes in athletes' personal, social and occupational lives, this can in turn potentially affect individuals cognitively, emotionally and behaviorally. The social and professional changes induced by retirement from sport can in effect cause distressful reactions These retired athletes express a feeling of emptiness in their lives and one of the main stakes of this transition is to therefore reconstruct and adjust themselves on the basis of a new lifestyle.

Athletes by nature are mentally tough individuals and are often perceived by the public to be fitter, healthier and happier than others. It is this attitude and stereotyping that can make it more difficult for them to approach someone for help. Therefore it is highly important for close family, friends, team mates and coaches to understand that depression cannot always be seen and the athlete may indeed never admit to how they feel for fear of shame and embarrassment. The most important message is to understand that despite their incredible success in their hard-fought and dedicated careers, the process of retirement is a difficult one and it is in this time that social support and communication is of vital importance if the athlete is to avoid the dreaded post-retirement blues.

Read the passage to answer the questions that follow.

Conformity, or acting the way most other people in one's social group act, often grows out of a person's desire for security and belonging in a group — usually a group of similar age, culture, religion, or educational background. Acting differently from the group carries the risk of social rejection, a deep fear that many people have. The drive to conform is often particularly powerful for adolescents, for whom acceptance by peers can be a primary goal, but it also affects people of all ages. Some studies suggest that conformity decreases with age.

Although the word often has a negative connotation, conformity is not necessarily a bad thing. The tendency of people to conform helps society to function smoothly in many ways. Following rules for driving, for example, enables safe transportation. The tendency of people to follow norms of interpersonal interaction enables effective communication and collaboration.

Psychologist Herbert Kelman identified and labeled three major types of conformity. The first, compliance, occurs when a person conforms publicly, but privately keeps his or her own original beliefs. People comply because of a need for approval from others and fear of rejection. The second, identification, is conforming to a particular person who is well liked and respected, such as a friend or a family member. Identification is usually motivated by the perceived role model's attractiveness or success. Internalization is when people have actually internalized a group's belief system and see it as truly their own, both publicly and privately. This is the most profound form of conformity and is likely to stay with people for a long time.

The strong force of conformity is well documented in psychological research. A researcher named Muzafer Sherif, for example, wanted to know how many people would change their opinions about something because of the desire to conform to a larger group. He conducted an experiment in which people were positioned in a dark room and asked to stare at a small dot of light 15 feet away. They were then asked to guess the amount by which the light moved (the dot actually was not moving at all). On the first day, each person saw different degrees of movement; but from the second to the fourth day, the same estimate was agreed on and the members of the group conformed their opinions to this estimate. Sherif believed this experiment demonstrated the way a norm develops in a society, and how people tend to fit their personal beliefs to that norm. Few people desire to be an "outlier" whose opinion differs widely from what is typical in

The "dark side" of conformity has often been explored as well. The need to be accepted and the fear of punishment for deviating from group norms can in many cases impel people to unthinkingly adopt negative attitudes or behaviors. A phenomenon called the "spiral of silence" can occur when one opinion becomes entirely socially dominant because those people who have different opinions are afraid to speak or act on them. History is rife with examples of mass conformity to group norms and ideas that were destructive.

नीचे दिये गए गद्यांश को पढ़कर पूछे गये प्रश्नों के उत्तर दीजिए।

भारतीय मध्यकालीन समाज में जहाँ स्त्री दासी, चेरी एवं वस्तु के अतिरिक्त और कुछ न थी वहाँ पति परित्यक्त एवं विधवाओं की स्थिति अत्यंत दयनीय थी। उनके लिए समाज में कोई जगह नहीं थी और वे अपशकुन मानी जाती थीं। सामंतवाद ऐसी स्त्रियों का जीवन अमानवीय एवं घृणित बना देता था। श्रृंगार, भोजन, रहन-सहन एवं जीवन की सहज क्रियाओं पर इसका कठोर प्रतिबंध था। मीरा ऐसा जीवन नहीं जीतीं। वे राणा एवं उनकी व्यवस्था का विरोध करती हैं। मीरा सामंतवादी रूढ़ियों को तोड़ने के लिए रनिवास से बाहर निकल आईं, एक प्रकार से एक विशाल जनांदोलन में बहुत बड़ा जोखिम उठाकर कूद पड़ीं। यह जोखिम था सामाजिक प्रतिष्ठा खोने का। मीरा एकांतिक भक्ति न करके साधु-संतों के बीच आकर कृष्ण से माधुर्यभावना जोड़कर प्रीति की भक्ति करती हैं। विधवाएँ अपना आगे का जीवन भक्ति में लीन रहकर, कोने में बैठ जाप करके काटती थीं। राणा को मीरा की भक्ति भावना से समस्या नहीं थी, बल्कि मीरा का इस प्रकार रनिवास से बाहर निकलना साधु-समाज के बीच जाना अच्छा नहीं लगा। मीरा कुल की मर्यादा के विरुद्ध आचरण कर रही थीं। राणा की लोकनिंदा हो रही थी। राणा एवं सामंतवादी मनोवृत्ति का समाज मीरा के प्रतिकूल था। तब मीरा का दमन प्रारंभ होता है और मीरा पर प्रतिबंध लगाए जाते हैं, यहाँ तक कि उनकी हत्या तक का प्रयास किया जाता है।

भारतीय मध्यकालीन समाज में जहाँ स्त्री दासी, चेरी एवं वस्तु के अतिरिक्त और कुछ न थी वहाँ पति परित्यक्त एवं विधवाओं की स्थिति अत्यंत दयनीय थी। उनके लिए समाज में कोई जगह नहीं थी और वे अपशक्न मानी जाती थीं। सामंतवाद ऐसी स्त्रियों का जीवन अमानवीय एवं घृणित बना देता था। शृंगार, भोजन, रहन-सहन एवं जीवन की सहज क्रियाओं पर इसका कठोर प्रतिबंध था। मीरा ऐसा जीवन नहीं जीतीं। वे राणा एवं उनकी व्यवस्था का विरोध करती हैं। मीरा सामंतवादी रूढ़ियों को तोड़ने के लिए रनिवास से बाहर निकल आईं, एक प्रकार से एक विशाल जनांदोलन में बह्त बड़ा जोखिम उठाकर कूद पड़ीं। यह जोखिम था सामाजिक प्रतिष्ठा खोने का। मीरा एकांतिक भक्ति न करके साध्-संतों के बीच आकर कृष्ण से माध्रयभावना जोड़कर प्रीति की भक्ति करती हैं। विधवाएँ अपना आगे का जीवन भक्ति में लीन रहकर, कोने में बैठ जाप करके काटती थीं। राणा को मीरा की भक्ति भावना से समस्या नहीं थी, बल्कि मीरा का इस प्रकार रनिवास से बाहर निकलना साधु-समाज के बीच जाना अच्छा नहीं लगा। मीरा कुल की मर्यादा के विरुद्ध आचरण कर रही थीं। राणा की लोकनिंदा हो रही थी। राणा एवं सामंतवादी मनोवृत्ति का समाज मीरा के प्रतिकूल था। तब मीरा का दमन प्रारंभ होता है और मीरा पर प्रतिबंध लगाए जाते हैं, यहाँ तक कि उनकी हत्या तक का प्रयास किया जाता है।
