No standardised tests, no private schools, no stress. Finland's education system is consistently ranked best in the world. Why isn't America copying it? Time and time again, American students continually rank near the middle or bottom among industrialised nations when it comes to performance in math and science. The Program for International Student Assessment (PISA) which in conjunction with the Organization for Economic Cooperation and Development (OECD) routinely releases data which shows that Americans are seriously lagging behind in a number of educational performance assessments.

Despite calls for education reform and a continual lacklustre performance on the international scale, not a lot is being done or changing within the educational system. Many private and public schools run on the same antiquated systems and schedules that were once conducive to an agrarian society. The mechanisation and rigid assembly-line methods we use today are spitting out ill-prepared worker clones, rudderless adults and an uninformed populace. But no amount of pontificating will change what we already know. The American education system needs to be completely revamped – from the first grade to the Ph.D. It's going to take a lot more than a well-meaning celebrity project to do that.

Many people are familiar with the stereotype of the hard-working, rote memorisation, myopic tunnel vision of Eastern Asian study and work ethics. Many of these countries, like China, Singapore, and Japan amongst others routinely rank in the number one spots in both, math and science.

Some pundits point towards this model of exhaustive brain draining as something Americans should aspire to become. Work more! Study harder! Live less. The facts and figures don't lie – these countries are outperforming us, but there might be a better and healthier way to go about this.

Finland is the answer – a country rich in intellectual and educational reform has initiated over the years a number of novel and simple changes that have completely revolutionised their educational system. They outrank the United States and are gaining on Eastern Asian countries.

Are they cramming in dimly-lit rooms on robotic schedules? Nope. Stressing over standardised tests enacted by the government? No way. Finland is leading the way because of common-sense practices and a holistic teaching environment that strives for equity over excellence. Staying in line with our print-minded sensibilities, standardised testing is the blanket way we test for subject comprehension. Filling in little bubbles on a scantron and answering pre-scanned questions is somehow supposed to be a way to determine mastery or at least competence of a subject. Students often learn to cram just to pass a test and teachers teach with the sole purpose of students passing a test. Learning has been thrown out of the equation.

Finland has no standardised tests. All children throughout Finland are graded on an individualised basis and grading system set by their teacher and take a voluntary test at the end of upper-secondary school.

Read the following passage and answer the questions that follow.

Bhikaji Cama was born on 24 September 1861 into a large, affluent Parsi family. Her father, Sorabji Framji Patel, was a famous merchant and philanthropist in the city of Bombay and Madam Bhikaji Cama herself became an active social worker. Influenced by an environment in which the Indian nationalist movement was taking root, Bhikaji was drawn toward political issues from a very early age.

During the epidemic of bubonic plague that hit Mumbai in 1896, she herself got infected with the disease while providing aid to the others and she was sent to Britain for her treatment. In 1902, Bhikaji left India for London which was to become her home for the rest of life. She was advised to go to Europe for rest and recuperation.

Throughout her life, she struggled for Indian Independence from abroad. On 22nd August 1907, she unfurled the Indian flag (Flag of Indian Independence) in Stuttgart, Germany while attending the International Socialist Conference. There she raised her voice for human rights and equality in India.

The fiery lady then announced, "This is the flag of independent India. I appeal to all gentlemen to stand and salute the flag." Surprised by the dramatic incident, all the representatives at the conference stood up and saluted the first flag of independent Hindustan. Madam Cama had wanted to bring the poverty, starvation and oppression under the British Raj, as also India's thirst for freedom to the attention of the international community and she had succeeded.

This was no mean achievement. Indian independence was 40 years away, and the world was still unaware of the burning patriotism of the thousands of young Indians who were ready to lay down their lives to free their country from colonial rule. During her stay in London, she got a message from the British that her return to India would be prohibited unless she would sign a statement promising not to participate in nationalist activities. She refused to make such a promise and remained in exile in Europe.

After Stuttgart, Bhikaji went to United States where she travelled a lot, informing Americans about India's struggle for independence. She also fought for the cause of women and often stressed on the role of women in building a nation. Speaking at National Conference at Cairo, Egypt in 1910, she asked, "Where is the other half of Egypt? I see only men who represent half the country! Where are the mothers? Where are the sisters? You must not forget that the hands that rock cradles also build persons."

Cama remained in exile in Europe until 1935, when, gravely ill and paralysed by a stroke that she had suffered earlier that year, she petitioned the British government to be allowed to return home. Knowing that she was not in a condition to participate in the freedom struggle, she was granted permission to return to India after 33 long years.

In November 1935, 74-year-old Bhikaji finally returned to Mumbai, but did not live for long. Having fulfilled her desire of seeing her motherland once again, she breathed her last on 13 August 1936.

नीचे दिए गए गद्यांश को पढ़कर पूछे गए प्रश्नों के उत्तर दीजिए।

मीरा का साहस आज वर्तमान में उपभोग की वस्तु एवं बाजारवाद की शिकार स्त्री के लिए अत्यंत महत्वपूर्ण है। मीरा स्वतंत्रता एवं शक्ति का प्रतीक लगने लगती हैं। मीरा मनुष्य को प्रेम करने की स्वतंत्रता पर बल देती हैं। प्रेम मनुष्य हृदय का विस्तार करता है और विरोध की शक्ति पैदा करता है। मीरा ने स्त्री के उस स्वर को वाणी दी जो सामंतवादी व्यवस्था एवं पितृसत्ता ने दबा रखी थी। मीरा ने समाज से लड़ने के पूर्व परिवार में संघर्ष किया। समाज से पहले अपनों के दमन को झेला। अंतत: मीरा द्वारका पहुँचती हैं। मीरा की मृत्यु को लेकर रहस्य है। किवदंती है कि मीरा कृष्ण की मूर्ति में समा गईं। मूर्ति में समाना वैसे ही है जैसे अगस्त जी का घड़े से उत्पन्न होना। मीरा आत्महत्या नहीं कर सकतीं। आत्महत्या करने वाला व्यक्ति संघर्ष करने से डरता है। प्रमाण न होने से किवदंतियों का निर्माण हुआ। मीरा और अधिक समय रह जातीं तो सत्ता को हानि ही थी। वैसे भी संप्रदाय वाले संत भी मीरा से खुश नहीं थे। मीरा ने विरोध का स्वर गाया और दासता स्वीकार नहीं की, न राणा की न ही किसी संप्रदाय की। मीरा जीवन एवं संसार का सत्य जान चुकी थीं। मीरा ने स्वतंत्रता का रस चख लिया तो दुबारा नहीं बांधी जा सकीं।

मीरा का साहस आज वर्तमान में उपभोग की वस्तु एवं बाजारवाद की शिकार स्त्री के लिए अत्यंत महत्वपूर्ण है। मीरा स्वतंत्रता एवं शक्ति का प्रतीक लगने लगती हैं। मीरा मनुष्य को प्रेम करने की स्वतंत्रता पर बल देती हैं। प्रेम मन्ष्य हृदय का विस्तार करता है और विरोध की शक्ति पैदा करता है। मीरा ने स्त्री के उस स्वर को वाणी दी जो सामंतवादी व्यवस्था एवं पितृसत्ता ने दबा रखी थी। मीरा ने समाज से लड़ने के पूर्व परिवार में संघर्ष किया। समाज से पहले अपनों के दमन को झेला। अंततः मीरा द्वारका पहुँचती हैं। मीरा की मृत्यु को लेकर रहस्य है। किवदंती है कि मीरा कृष्ण की मूर्ति में समा गईं। मूर्ति में समाना वैसे ही है जैसे अगस्त जी का घड़े से उत्पन्न होना। मीरा आत्महत्या नहीं कर सकतीं। आत्महत्या करने वाला व्यक्ति संघर्ष करने से डरता है। प्रमाण न होने से किवदंतियों का निर्माण हुआ। मीरा और अधिक समय रह जातीं तो सत्ता को हानि ही थी। वैसे भी संप्रदाय वाले संत भी मीरा से खुश नहीं थे। मीरा ने विरोध का स्वर गाया और दासता स्वीकार नहीं की, न राणा की न ही किसी संप्रदाय की। मीरा जीवन एवं संसार का सत्य जान चुकी थीं। मीरा ने स्वतंत्रता का रस चख लिया तो दुबारा नहीं बांधी जा सकीं।

सौंदर्य के संबंध में विचारकों का एक वर्ग सौंदर्य के वस्तुगत आधार की बात करता है। इस वर्ग के अनुसार सौंदर्य बोध का भौतिक आधार होता है। भौतिक आधार में सामाजिक, ऐतिहासिक तथा वर्ग-स्थिति की बात आती है। यहीं विचारधारा और यथार्थवाद की बात भी उठती है। मार्क्स ने कला और साहित्य के प्रसंग में सौंदर्यबोध, सौंदर्यानुभूति के सामाजिक स्वरूप, विचारधारात्मक अधिरचना में कला, कला का यथार्थ से सौंदर्यशास्त्रीय रिश्ता आदि विषयों पर विचार किया है। मार्क्स के विचारों का विकास बाद में अनेक मार्क्सवादियों ने किया है। यह अनंत स्वरूप रूपात्मक जगत अपने सारे आकर्षण को लिए हुए अनादिकाल से मनुष्य को अपनी ओर आकर्षित करता रहा है। मार्क्सवादी सौंद्रयशास्त्रीय आलोचकों का रचनाकारों से आग्रह रहा है कि वे लोकजीवन की गहराइयों में उतरें, सौंदर्य के इस अक्षय स्रोत का साक्षात्कार कर उससे अपनी सर्जना को स्थायी महत्व एवं प्राणवत्ता प्रदान करें। मार्क्सवाद मानता है कि प्रकृति और उसके अन्य उपकरण अपने आप में न सुंदर हो सकते हैं और न असुंदर। सौंदर्य की भावना तो मनुष्य में ऐतिहासिक परिस्थितियों के परिणामस्वरुप पैदा होती है। उदाहरण के लिए जो एक देश के लोगों के लिए सुंदर हो सकता है, वह दूसरे के लिए नहीं भी हो सकता है। एक ही देश में सौंदर्य बोध पीढ़ी-दर-पीढ़ी बदलता रहता है। **Sub questions**
