Read the following passage and answer the questions that follow.

How well countries adapt to the Fourth Industrial Revolution (4IR) will determine whether they 'thrive' or 'stagnate' and could further divide workforces and increase social tensions, according to the latest version of the World Economic Forum's Global Competitiveness Report.

Almost 40 years after its first annual assessment of the global economy, the Forum's 2018 report uses new methodology to understand the full impact of the 4IR, and finds factors including human capital, agility, resilience, openness and innovation becoming increasingly important.

The new index measures 140 economies against 98 indicators, organized into 12 'pillars' or drivers of productivity, to determine how close the economy is to the ideal state or 'frontier' of competitiveness. The US topped the rankings, being 'closest to the competitiveness frontier', with Singapore, Germany, Switzerland and Japan completing the top five. At the other end of the scale, Haiti, Yemen and Chad were found to be the least competitive economies.

Competitiveness is not only associated with higher incomes, but also better socio - economic outcomes, including life satisfaction. The US scored 85.6 out of 100 to top the index, coming in the top three for seven of the 12 pillars. Its entrepreneurial culture saw it score highly in the business dynamism pillar. It also scored highly for its labour market and financial system.

But, there were several areas which showed it still has more to do. It notably drops behind other advanced economies in the health pillar, with a life expectancy of 67.7 years, putting it in 46th place. And it was far from the frontier for checks and balances (40th place), judicial independence (15th) and corruption (16th).

The top 11 countries all score above 80 points for competitiveness. Second - placed Singapore (83.5) is defined by its high score for openness and it leads the way for infrastructure, with a near - perfect score of 95.7 for its world - beating transport system.

Germany, in third place, is the highest placed European economy for competitiveness, with particular strength in innovation capability (first place, with 88), business dynamism (82, second behind the US) and health (94). One of the key findings from the report is that all economies could do better in certain areas. For example, while Singapore might be the most 'future - ready' economy, Finland outdoes it for having a digitally skilled workforce.

And while low and middle - income economies can leverage technology to jumpstart growth, the report emphasises the importance of 'old' developmental pillars, such as governance, infrastructure and skills. Worryingly, of the 140 economies surveyed, 117 still lagged behind for quality of institutions, which impacted their overall competitiveness.

There was also widespread weakness at mastering the innovation process, with 103 countries scoring lower than 50 when it comes to following through from idea generation to commercial product.

Read the passage and answer the following questions.

Annie Besant was a British social reformer, campaigner for women's rights and a supporter of Indian nationalism. Annie Woods was born in London on 1 October 1847. She had an unhappy childhood, undoubtedly partly due to her father's death when she was five. Annie's mother persuaded her friend Ellen Marryat, sister of the writer Frederick Marryat, to take responsibility for her daughter and Ellen ensured that Annie received a good education.

In 1867, Annie married Frank Besant, a clergyman, and they had two children. But Annie's increasingly anti - religious views led to a legal separation in 1873. Besant became a member of the National Secular Society, which preached 'free thought', and also of the Fabian Society, the noted socialist organisation.

In the 1870s, Annie Besant and Charles Bradlaugh edited the weekly National Reformer, which advocated advanced ideas for the time on topics such as trade unions, national education, women's right to vote, and birth control. For their pamphlet on birth control the two were brought to trial for obscenity, but were subsequently acquitted.
Besant supported a number of workers' demonstrations for better working conditions. In 1888, she helped organise a strike of the female workers at the Bryant and May match factory in East London. The women complained of starvation wages and the terrible effects on their health of phosphorus fumes in the factory. The strike eventually led to their bosses significantly improving their working situation.

Social and political reform seems not to have satisfied Besant's hunger for some all - embracing truth to replace the religion of her youth. She became interested in Theosophy, a religious movement founded in 1875 and based on Hindu ideas of karma and reincarnation. As a member and later leader of the Theosophical Society, Besant helped to spread Theosophical beliefs around the world, notably in India.

Besant first visited India in 1893 and later settled there, becoming involved in the Indian nationalist movement. In 1916 she established the Indian Home Rule League, of which she became president. She was also a leading member of the Indian National Congress.

In the late 1920s, Besant travelled to the United States with her protégé and adopted son Jiddu Krishnamurti, who she claimed was the new Messiah and incarnation of Buddha. Krishnamurti rejected these claims in 1929. Besant died in India on 20 September 1933.

Read the passage and answer the following questions.

Annie Besant was a British social reformer, campaigner for women's rights and a supporter of Indian nationalism. Annie Woods was born in London on 1 October 1847. She had an unhappy childhood, undoubtedly partly due to her father's death when she was five. Annie's mother persuaded her friend Ellen Marryat, sister of the writer Frederick Marryat, to take responsibility for her daughter and Ellen ensured that Annie received a good education.

In 1867, Annie married Frank Besant, a clergyman, and they had two children. But Annie's increasingly anti - religious views led to a legal separation in 1873. Besant became a member of the National Secular Society, which preached 'free thought', and also of the Fabian Society, the noted socialist organisation.

In the 1870s, Annie Besant and Charles Bradlaugh edited the weekly National Reformer, which advocated advanced ideas for the time on topics such as trade unions, national education, women's right to vote, and birth control. For their pamphlet on birth control the two were brought to trial for obscenity, but were subsequently acquitted.
Besant supported a number of workers' demonstrations for better working conditions. In 1888, she helped organise a strike of the female workers at the Bryant and May match factory in East London. The women complained of starvation wages and the terrible effects on their health of phosphorus fumes in the factory. The strike eventually led to their bosses significantly improving their working situation.

Social and political reform seems not to have satisfied Besant's hunger for some all - embracing truth to replace the religion of her youth. She became interested in Theosophy, a religious movement founded in 1875 and based on Hindu ideas of karma and reincarnation. As a member and later leader of the Theosophical Society, Besant helped to spread Theosophical beliefs around the world, notably in India.

Besant first visited India in 1893 and later settled there, becoming involved in the Indian nationalist movement. In 1916 she established the Indian Home Rule League, of which she became president. She was also a leading member of the Indian National Congress.

In the late 1920s, Besant travelled to the United States with her protégé and adopted son Jiddu Krishnamurti, who she claimed was the new Messiah and incarnation of Buddha. Krishnamurti rejected these claims in 1929. Besant died in India on 20 September 1933.

नीचे दिये गए गद्यांश को पढ़कर पूछे गये प्रश्नों के उत्तर दीजिए।

मीरा को साधु और असाधु समाज का ज्ञान था। वे सामंतवादी मनोवृत्ति से ग्रस्त वैरागी, संप्रदायी एवं मठाधीश साधुओं को साधु नहीं स्वीकारती, बल्कि उन को कूड़ा कहती हैं। साधु उनके लिए दया, करुणा और प्रेम से भरा हुआ मनुष्य हो सकता है। भगवावस्त्रधारी, तिलकधारी एवं फकीर साधु नहीं, साधु वह है जिसकी मानवता पूंजी है, समाजकल्याण जिसका कर्तव्य और स्वतंत्रता जिसका धर्म। मीरा ने मध्यकाल में ही पर्दाप्रथा का विरोध किया। पर्दाप्रथा मनुष्य होने के अधिकारों का हनन है। रेगिस्तानी क्षेत्रों में मुंह ढकना, सिर बांधना एवं घूँघट पर्यावरण से बचने के लिए स्त्री पुरुष दोनों समान रुप से किया करते थे। रेतीली हवाएं जीवन के लिए हानिकारक थीं, किंतु धीरे - धीरे उसे पवित्रता एवं धार्मिक संस्कार से जोड़कर स्त्री के लिए अनिवार्य बना दिया। लज्जा स्त्री के विशेष गुणों में गिना जाने लगा। अंगों का दिखना एवं सीधे देखना, बोलना, चलना, बैठना, बाहर निकलना, समाज में आना सब के आगे पर्दा और लज्जा को खड़ा कर दिया।

मीरा को साधु और असाधु समाज का ज्ञान था। वे सामंतवादी मनोवृत्ति से ग्रस्त वैरागी, संप्रदायी एवं मठाधीश साधुओं को साधु नहीं स्वीकारती, बल्कि उन को कूड़ा कहती हैं। साधु उनके लिए दया, करुणा और प्रेम से भरा हुआ मनुष्य हो सकता है। भगवावस्त्रधारी, तिलकधारी एवं फकीर साधु नहीं, साधु वह है जिसकी मानवता पूंजी है, समाजकल्याण जिसका कर्तव्य और स्वतंत्रता जिसका धर्म। मीरा ने मध्यकाल में ही पर्दाप्रथा का विरोध किया। पर्दाप्रथा मनुष्य होने के अधिकारों का हनन है। रेगिस्तानी क्षेत्रों में मुंह ढकना, सिर बांधना एवं घूँघट पर्यावरण से बचने के लिए स्त्री पुरुष दोनों समान रुप से किया करते थे। रेतीली हवाएं जीवन के लिए हानिकारक थीं, किंतु धीरे - धीरे उसे पवित्रता एवं धार्मिक संस्कार से जोड़कर स्त्री के लिए अनिवार्य बना दिया। लज्जा स्त्री के विशेष गुणों में गिना जाने लगा। अंगों का दिखना एवं सीधे देखना, बोलना, चलना, बैठना, बाहर निकलना, समाज में आना सब के आगे पर्दा और लज्जा को खड़ा कर दिया।
