Read the following passage and answer the questions that follow:

There seems to be a lot of talk these days about what is fair, and what is not. We clearly have no choice about how we come into this world, we have little choice early in life, but as we grow older choices abound. I have long believed that while we have no control over the beginning of our life, the overwhelming majority of us have the ability to influence the outcomes we attain. Fair is a state of mind, and most often, an unhealthy state of mind.

In business, in politics, and in life, most of us are beneficiaries of the outcomes we have contributed to. Our station in life cannot, or at least should not, be blamed on our parents, our teachers, our pastors, our government, or our society — it's largely based on the choices we make, and the attitudes we adopt. People have overcome poverty, drug addiction, incarceration, abuse, divorce, mental illness, victimization, and virtually every challenge known to man. Life is full of examples of the uneducated, the mentally and physically challenged, people born into war-torn impoverished backgrounds, who could have complained about life being unfair, but who instead chose a different path — they chose to overcome the odds and to leave the world better than they found it. Regardless of the challenges they faced, they had the character to choose contribution over complaint.

I don't dispute that challenges exist. I don't even dispute that many have an uphill battle due to the severity of the challenges they face. What I vehemently dispute is attempting to regulate, adjudicate, or legislate fairness somehow solves the world's problems. Mandates don't create fairness, but people's desire and determination can work around or overcome most life challenges.

It's not the circumstances by which you come into this world, but what you make of them once you arrive that matter. One of my clients came to this country from Africa in his late teens, barely spoke the language, drove a cab while working his way through college, and is now the president of a large technology services firm. Stories such as this are all around us — they are not miracles, nor are they the rare exception. They do however demonstrate blindness to the mindset of the fairness doctrine.

We all face challenges, and life treats us all unfairly.. When I suffered a debilitating stroke at an early age, I certainly asked myself "why did this happen to me?" I could have felt sorry for myself and became bitter, I could have thrown in the towel and quit on my family and myself — I didn't. It took two years of gut-wrenching effort, but what I thought was a great injustice at the time changed my life for the better. Today, you couldn't tell I ever had a stroke. The greatest adversity life can throw at you simply affords you an opportunity to make changes, improve, and get better.

Read the following passage and answer the questions that follow:

One of the talks from the TED2 stage in Long Beach, Calif., this week came from Richard Turere, an inventor. He is a Maasai from Kenya. And he's 13.

"From ages 6 to 9, I started looking after my father's cows," Richard says. "I'd take them out in the morning and bring them back in the evening. We put them in a small cow shed at night," and that's when the trouble would start. Lions would jump in the shed and kill the cows, which are enclosed and an easy target.

Lions are the top tourist attraction to Kenya, especially in the Nairobi National Park, which is near where Richard lives. Lions are also considered critically endangered in Kenya. The Kenya Wildlife Service estimates there are just 2,000 lions left in the country. One of the main causes of their demise, "is that people kill them in retaliation for lions attacking their livestock," says Paula Kahumbu, executive director of Wildlife Direct, a wildlife conservation organization in Africa.

She has been studying the conflict between humans and lions, and her work led her to Richard. In one week, she monitored over 50 cases where lions attacked livestock. "It's a very, very serious problem," she says.

One night he was walking around with a flashlight and discovered the lions were scared of a moving light. A light went on inside him and an idea was born.

Three weeks and much tinkering later, Richard had invented a system of lights that flash around the cow shed, mimicking a human walking around with a flashlight. His system is made from broken flashlight parts and an indicator box from a motorcycle.

"The only thing I bought was a solar panel," which charges a battery that supplies power to the lights at night, Richard says. He calls the system Lion Lights.

"There have been a lot of efforts to try to protect the lions," Kahumbu says. "It's a crisis and everyone is looking for a solution. One idea was land leases, another was lion-proof fences. And basically no one even knew that Richard had already come up with something that worked."

His simple solution was so successful, his neighbors heard about it and wanted Lion Lights, too. He installed the lights for them and for six other homes in his community. From there, the lights spread and are now being used all around Kenya. Someone in India is trying them out for tigers. In Zambia and Tanzania they're being used, as well.

To get to the TED stage, Richard traveled on an airplane for the first time in his life. He says he has a lot to tell his friends about when he goes back home, and among the scholars and prize winners, scientists and poets, what impressed him the most on his trip was something he saw at the nearby Aquarium of the Pacific: "It was my first time seeing a shark. I' ve never seen a shark.

Read the following passage and answer the questions that follow:

One of the talks from the TED2 stage in Long Beach, Calif., this week came from Richard Turere, an inventor. He is a Maasai from Kenya. And he's 13.

"From ages 6 to 9, I started looking after my father's cows," Richard says. "I'd take them out in the morning and bring them back in the evening. We put them in a small cow shed at night," and that's when the trouble would start. Lions would jump in the shed and kill the cows, which are enclosed and an easy target.

Lions are the top tourist attraction to Kenya, especially in the Nairobi National Park, which is near where Richard lives. Lions are also considered critically endangered in Kenya. The Kenya Wildlife Service estimates there are just 2,000 lions left in the country. One of the main causes of their demise, "is that people kill them in retaliation for lions attacking their livestock," says Paula Kahumbu, executive director of Wildlife Direct, a wildlife conservation organization in Africa.

She has been studying the conflict between humans and lions, and her work led her to Richard. In one week, she monitored over 50 cases where lions attacked livestock. "It's a very, very serious problem," she says.

One night he was walking around with a flashlight and discovered the lions were scared of a moving light. A light went on inside him and an idea was born.

Three weeks and much tinkering later, Richard had invented a system of lights that flash around the cow shed, mimicking a human walking around with a flashlight. His system is made from broken flashlight parts and an indicator box from a motorcycle.

"The only thing I bought was a solar panel," which charges a battery that supplies power to the lights at night, Richard says. He calls the system Lion Lights.

"There have been a lot of efforts to try to protect the lions," Kahumbu says. "It's a crisis and everyone is looking for a solution. One idea was land leases, another was lion-proof fences. And basically no one even knew that Richard had already come up with something that worked."

His simple solution was so successful, his neighbors heard about it and wanted Lion Lights, too. He installed the lights for them and for six other homes in his community. From there, the lights spread and are now being used all around Kenya. Someone in India is trying them out for tigers. In Zambia and Tanzania they're being used, as well.

To get to the TED stage, Richard traveled on an airplane for the first time in his life. He says he has a lot to tell his friends about when he goes back home, and among the scholars and prize winners, scientists and poets, what impressed him the most on his trip was something he saw at the nearby Aquarium of the Pacific: "It was my first time seeing a shark. I've never seen a shark.

नीचे दिये गए गद्यांश को पढ़कर पूछे गये प्रश्नों के उत्तर दीजिए।
यथार्थ उसे कहते हैं जो किसी सत्य या घटना को बिना काट छांट के उद्घाटित करता हो
। यथार्थ एक ऐसी सच्चाई है जिसे किसी भी युग का साहित्यकार चाहते हुए भी
अनदेखा नहीं कर सका है और कदाचित यही कारण है कि पश्चिम में ही नहीं पूर्व में भी
यथार्थ का स्वर कभी स्पष्टत: तो कभी दबे-दबे रूप में अवश्य बना रहा। यथार्थ केवल
जीवन के ऐंद्रिय रूप का आकलन नहीं बल्कि मानसिक, बौद्धिक, आध्यात्मिक सभी
पहलू उसमें समाविष्ट हैं। समाजवादी यथार्थवाद, अतियथार्थवाद, प्रकृतवाद,
मनोविज्ञानवाद, अस्तित्ववाद आदि समस्त जीवन विषयक दृष्टिकोण अपनी-अपनी
विशिष्ट दृष्टि से जीवन को देखकर उसके यथार्थ को गहरे स्तर पर समझने बूझने का
प्रयत्न करते हैं।

नीचे दिये गए गद्यांश को पढ़कर पूछे गये प्रश्नों के उत्तर दीजिए।

मार्क्स एंगेल्स साहित्य का निश्चित प्रयोजन मानते हैं लेकिन साहित्य में उसे सीधे-सीधे व्यक्त करने के समर्थक नहीं हैं। मिन्ना काउत्स्की को दिये पत्र में एंगेल्स ने लिखा है- 'मैं यों प्रयोजनमुखी काव्य का कदापि विरोधी नहीं हूँ।.... परंतु मैं सोचता हूँ कि प्रयोजन को स्वयं परिस्थिति तथा कार्यकलाप में अपने को व्यक्त करना चाहिए, विशेष रूप से लिखित किये बिना और लेखक अपने द्वारा वर्णित सामाजिक टकरावों का भावी ऐतिहासिक समाधान पाठक के सामने तैयारशुदा रूप में प्रस्तुत करने के लिए कर्तव्यबद्ध नहीं है। एंगेल्स ने अन्यत्र लिखा है- 'लेखक के विचार जितने छुपे रहें, कला की कृति उतनी ही अच्छी होती है। मैं जिस यथार्थवाद की बात कर रहा हूँ वह लेखक के दृष्टिकोण के बावजूद उभर सकता है। मार्गरेट हार्कनेस को 1888 में लिखे पत्र में उन्होंने यथार्थवाद के बारे में लिखा है- 'मेरी राय में, यथार्थवाद का अर्थ तफसील की सच्चाई का, आम परिस्थितियों में आम चित्रों का सच्चाई भरा पुनर्स्जन है।' इस प्रकार स्पष्ट है कि मार्क्स एंगेल्स कलात्मक सौन्दर्य की उपेक्षा नहीं करते। वे विचारधारात्मक आग्रह की माँग करते हैं लेकिन रचना की कीमत पर नहीं। यही नहीं, वे यथार्थ चित्रण को विचारधारा से अधिक महत्वपूर्ण मानते हैं।
