Read the given passage and answer the questions that follow.

Marie was born in 1867 in Warsaw, Poland, where her father was a Professor of Physics. At an early age, she displayed a brilliant mind and a blithe personality. Her great exuberance for learning prompted her to continue with her studies after high school. She became disgruntled, however, when she learned that the university in Warsaw was closed to women. Determined to receive a higher education, she defiantly left Poland and in 1891 entered the Sorbonne, a French university, where she earned her master's degree and doctorate in physics.

Marie was fortunate to have studied at the Sorbonne with some of the greatest scientists of her day, one of whom was Pierre Curie. Marie and Pierre were married in 1895 and spent many productive years working together in the physics laboratory. A short time after they discovered radium, Pierre was killed by a horse-drawn wagon in 1906. Marie was stunned by this horrible misfortune and endured heart-breaking anguish. Despondently, she recalled their close relationship and the joy that they had shared in scientific research. The fact that she had two young daughters to raise by herself greatly increased her distress.

Curie's feeling of desolation finally began to fade when she was asked to succeed her husband as a physics professor at the Sorbonne. She was the first woman to be given a professorship at the world-famous university. In 1911, she received the Nobel Prize in chemistry for isolating radium. Although Marie Curie eventually suffered a fatal illness from her long exposure to radium, she never became disillusioned about her work. Regardless of the consequences, she had dedicated herself to science and to revealing the mysteries of the physical world.

Read the given passage and answer the questions that follow. Of the forces that can best overcome all difficulties, love is the most potent force because the greatest law of God is love, which holds the key to all problems.

This mighty force not only enables you to put the ideal of selfless service into practice, but also transforms one into God. It has been possible through love for man to become God; and when God becomes man, it is also due to His Love for us. Love is dynamic in action and contagious in effect. Pure love is matchless in majesty; it has no parallel in power and there is no darkness it cannot dispel.

It is the undying flame that has set life aglow. Our emancipation depends upon our love for God and upon God's love for us. Where there is love, there is Oneness and, in complete Oneness, the Infinite is realised completely in every sphere of life, be it science, art or religion.

To those whose hearts are pure and simple, true love comes as a gift through the activating grace of a Perfect Master, and this Divine Love will perform the supreme miracle of bringing God into the hearts of men.

To realise God, we must love Him, losing ourselves in His Infinite Self. We can love God by surrendering to the Perfect Master who is God's personal manifestation.

The beginning of real love is obedience, and the highest aspect of this love that surpasses love itself is the aspect that culminates into the perfect obedience or supreme resignation to the Will and Wish of the Beloved. In this love are embodied all Yogas known to saints and seekers.

नीचे दिये गए गद्यांश को पढ़कर पूछे गये प्रश्नों के उत्तर दीजिए।

समय का दिव्य रथ हर किसी के द्वार पर आता है। कुछ लोग नींद में, आलस्य में पड़े रहकर उसके रथ की घरघराहट को नहीं सुन पाते और करवट बदलकर पुन: सो जाते हैं। कुछ लोग होते हैं जो तुरंत द्वार खोलकर समय का स्वागत करते हैं, उसे पहचानकर उसका कहा स्वीकारते हैं। समय ऐसे ही सौभाग्यशालियों की झोली में वरदान के फूल डालकर आगे बढ़ जाता हैं, किंतु जो अभागे उसे पहचान नहीं पाते और करवट बदलकर सोए रहते हैं या उसके प्रति उदासीनता व्यक्त करते हैं, समय का रथ-चक्र उन्हें कुचलकर आगे बढ़ जाता है। विद्यार्थी जीवन के लिए तो समय सर्वाधिक महत्वपूर्ण है। उसका हर पल हीरे-मोती सा कीमती होता है। यही कारण है की समय का सदुपयोग करने वाले सफलता के आसमान में भ्रमण करते हैं और समय को व्यर्थ बरबाद करने वाले होनहार, बुद्धिमान युवक भी बुरी तरह असफल हो जाते हैं।

विज्ञान ने वरदान के रूप में मानवजाति की अपार सेवा की है। वैज्ञानिक आविष्कारों ने आज असंभव को भी संभव बना दिया है। तेजगति से उड़ने वाले वायुयानों ने विश्व को एक परिधि में समेट कर छोटी इकाई बना दिया है। मनुष्य विज्ञान के कारण ही आकाश में गरुड़ की तरह दुत गित से विचरण कर सकता है, समुद्र की छाती को चीर कर उसे लांघ सकता है, अधेरे में प्रकाश का आलोक बिखेर सकता है। कंप्यूटर, रॉकेट, दूरदर्शन, चलचित्र, दूरभाष, मोबाइल और ऐसे ही न जाने कितने आश्चर्यजनक अद्भुत उपरणों तथा यंत्रों से मनुष्य ने सर्वत्र अपना साम्राज्य स्थापित कर लिया है। चिकित्सा के क्षेत्र में भी विज्ञान वरदान सिद्ध हुआ है। शिक्षा, कृषि, यातायात, उद्योग, मनोरंजन आदि समस्त क्षेत्रों में विज्ञान ने अपना लोहा मनवाया है। जड़ बन गया है। मानवता को नष्ट-किनष्ट करने वाले अणु-अस्त्र अब मानव जाति के लिए बड़ा संकट बन रहे हैं। 'संपूर्ण विनाश' की दस्तक भी विज्ञान ही दे रहा है।
