Read the following information carefully and answer the given questions.

Adeline Virginia Woolf was an English writer, considered one of the most important modernist 20th-century authors and also a pioneer in the use of stream of consciousness as a narrative device.Woolf was born into an affluent household in South Kensington, London, the seventh child in a blended family of eight. Her mother, Julia Prinsep Jackson, celebrated as a Pre-Raphaelite artist's model, had three children from her first marriage, while Woolf's father, Leslie Stephen, a notable man of letters, had one daughter. The Stephens produced another four children, including the modernist painter Vanessa Bell. While the boys in the family received college educations, the girls were home-schooled in English classics and Victorian literature. An important influence in Virginia Woolf's early life was the summer home the family used in St Ives, Cornwall, where she first saw the Godrevy Lighthouse, which was to become central in her novel To the Lighthouse (1927).

Woolf's childhood came to an abrupt end in 1895 with the death of her mother and her first mental breakdown, followed two years later by the death of her stepsister and a mother figure to her, Stella Duckworth. From 1897 to 1901, she attended the Ladies' Department of King's College London, where she studied classics and history and came into contact with early reformers of women's higher education and the women's rights movement. Other important influences were her Cambridge-educated brothers and unfettered access to her father's vast library.

Encouraged by her father, Woolf began writing professionally in 1900. Her father's death in 1905 caused another mental breakdown for Woolf. Following his death, the Stephen family moved from Kensington to the more bohemian Bloomsbury, where they adopted a free-spirited lifestyle. It was in Bloomsbury where, in conjunction with the brothers' intellectual friends, they formed the artistic and literary Bloomsbury Group.
