Answer the questions based on the following passage:

Almost every one grows up in the world which is flooded with the mass media e.g. television, advertising, films, videos, billboards, magazines, movies, music, newspaper, and internet. Of all marketing weapons, advertising is renowned for its long lasting impact on viewer's mind, as its exposure is much broader. Advertising is a subset of promotion mix which is one of the 4P's in the marketing mix i.e. product, price, place and promotion. As a promotional strategy, advertising serves as a major tool in creating product awareness in the mind of a potential consumer to take eventual purchase decision. Advertising, sales promotion and public relations are mass-communication tools available to marketers. Advertising through all mediums influence audiences, but television is one of the strongest medium of advertising and due to its mass reach; it can influence not only the individual's attitude, behaviour, life style, exposure and in the long run, even the culture of the country.

The major aim of advertising is to impact on buying behaviour; however, this impact about brand is changed or strengthened frequently in people's memories. Memories about the brand consist of those associations that are related to brand name in consumer mind. These brand cognition influence consideration, evaluation, and finally purchases. The principal aim of consumer behaviour analysis is to explain why consumers act in particular ways under certain circumstances. It tries to determine the factors that influence consumer behaviour, especially the economic, social and psychological aspects. When young people choose advertising information and characters as their role models, they may not only identify with them but also intend to copy them in terms of how they dress and what they are going to buy.

In today's dynamic world, it is almost impossible for advertisers to deliver advertising message and information to buyers without use of advertising. Certainly, this may be because of the globalization and accessibility of hundreds of channels for the viewers of this modern era. Now a days, due to globalized economy, this made available a bulk of marketing stimuli to the modern consumers. More often consumerism describes the way of equating personal happiness, with purchasing material possessions and consumption in excess of one's need.
