

## Odisha Fireman Exam 2023 Answer Key with Solution

### Section-I

**Directions:** Read the following passages and answer the questions based on them by choosing the correct options.

Evolution has designated vultures to be the ultimate scavengers. Enormous wingspans allow them to circle in the air for hours. Their beaks, while rather horrifying, are weak by bird standards, made to scoop and eat flesh. However unappealing they may seem; vultures serve an important role in the ecological cycle: processing the dead bodies of animals. Only 20 years ago, India had plenty of vultures—flocks so enormous that they darkened the skies. But by 1999, their numbers had dropped due to a mysterious kidney ailment. By 2008, 99.9 per cent of India's vultures were gone. It was finally discovered that they had been killed by a drug called diclofenac (a pain reliever along the lines of aspirin or ibuprofen). Indians revere their cows, and when a cow showed signs of pain, they treated it with diclofenac. After the animal died, the vultures would eat the corpse. And though they boast of, perhaps, the world's most efficient digestive system, the vultures cannot digest the drug. India banned the use of diclofenac for veterinary use in 2006, but it's still widely used. The near-extinction of vultures has caused disease in the country, as rats and dogs moved in to take their place—spreading pathogens that would have otherwise been destroyed by the vultures. Vultures need large ranges to scan for food and undisturbed areas in which to nest. They also need an abundance of prey species since they rely more on chance than their own hunting skills to eat. All of these things have been reduced by human activity. Meanwhile, there is a dramatic increase in secondary poisoning. Vultures feed on carcasses laced with poison, intended to kill jackals or other predatory carnivores or they are poisoned by the lead in animals left behind by hunters.

**Q1. Vultures serve an important role in the ecological cycle as:**

**Sol.** all of them

**Directions: Read the following passage carefully and answer the questions that follow:**

Reco families in the Carpathian Mountains were at loggerheads, over a disputed forest land. Ulrich von Gradwitz, the local nobleman was the head of the Gradwitz family whereas George Znaeym represented the Znaeym clan. The bone of contention between the two families was the Woodland. Each family held the view that the other claimed the woodland illegally. Though it began as a legal battle, it continued for generations as a hate-filled conflict between the 'two representatives of the families in the dispute. One night, both Ulrich and George, accompanied by their retainers and huntsmen, came out onto the land. Though each came to defend his claim over the land, the ulterior motive was to destroy his enemy by shooting him down. Each had a rifle in his hand, hate in his heart and murder in his mind. Leaving his retainers, Ulrich unexpectedly came all of a sudden face-to-face with George. Each one of them had a rifle in his hand and intended to use it because no interlopers would interfere. Before either of them could speak, a sharp blast of wind tore from the ground the giant beech tree under which they stood, pinning them underneath. The impact of the shock left them speechless. However, both of them were glad that they were still alive. But instead of continuing their conflict with gunshots, they had to continue their conflict in words. A little later, Ulrich freed an arm and reached into his pocket for the wine flask that he had carried, greatly relishing the drink. As he looked across at his enemy, some change came over him. He offered George a drink from the which the other was barely able to reach. Under the combined effects of the situation, the /shock, and the wine, Ulrich saw the similarity between him and his fellow sufferer, and this brought a change of heart in him.
