	Comprehension: In the following passage, some words have been deleted. Read the passage carefully and
	select the most appropriate option to fill in each blank.
	Countries should act to establish mechanisms (1) women's equal participation and equitable representation at all levels of the political process and public life in each community and society and enabling women to articulate their concerns and needs. Government and organisations should try (2) all practices that discriminate (3) women; assisting women to establish and realise their rights, including those that relate to reproductive and sexual health. Adopting appropriate measures to improve women's ability to earn income beyond traditional occupations, achieve economic self-reliance and ensure women's equal access to the labour market and social security systems IS NECESSARY Also, violence and safety is a major (4) to women in society. Domestic violence,
	rapes, etc are alarmingly increasing day by day. More so, because women are afraid to speak up. Similarly, the women who do the same work get paid less than their male counterparts. It is (5) unfair and sexist to pay someone less for the same work because of their gender. Thus, we see how women's empowerment is the need of the hour.

Q.21 Ans	Many scientists believe that oceans will not look the same in the future. Oceans will change their colour. The reason behind this scenario will be climatic change as it will make the blue and green colour of the oceans bluer and greener, respectively. Many scientific researchers have proven that it will stimulate the growth of many creatures that live in oceans and affect the colour we see. The reason we find an ocean blue is the combination is the sunlight's interaction with water molecules and whichever creatures live in the water. The molecules presented in water absorb all colours except blue which is reflected back. The green colour of the water is because of Phytoplankton which are tiny microscopic organisms like plants that use sunlight to create a chemical energy which is essential for their survival. SubQuestion No : 21 Choose the most appropriate title for the passage. <ul> <li>1. Climate Change</li> <li>2. Blue and Green</li> <li>3. Weather Conditions</li> </ul>
	X 4. Ocean Colour

	Comprehension:		
	Read the given passage and answer the questions that follow.		
	Many scientists believe that oceans will not look the same in the future. Oceans will change		
	their colour. The reason behind this scenario will be climatic change as it will m and green colour of the oceans bluer and greener, respectively. Many scientific have proven that it will stimulate the growth of many creatures that live in ocea the colour we see. The reason we find an ocean blue is the combination is the interaction with water molecules and whichever creatures live in the water. The presented in water absorb all colours except blue which is reflected back. The the water is because of Phytoplankton which are tiny microscopic organisms lil use sunlight to create a chemical energy which is essential for their survival.	ake the blue researchers ns and affect sunlight's molecules green colour of
