Q.3 Two statements are given, followed by two conclusions numbered I and II. Assuming the statements to be true, even if they seem to be at variance with commonly known facts, decide which of the conclusions logically follow(s) from the statements.

Statements:

All phones are gadgets.

All gadgets are machines.

Conclusions:

I. All phones are machines.

II. All machines are gadgets.

- Ans
- 1. Both conclusions I and II follow
  - 2. Only conclusion II follows
  - 3. Neither conclusion I nor II follows
  - 4. Only conclusion I follows

Chosen Option : 3

Q.40 Select the most appropriate idiom for the underlined segment in the given sentence.

I took a quick trip to my cousin's house before going on vacation to Africa.

- Ans  1. Break the journey  
 2. Paid a flying visit  
 3. Lived out of a suitcase  
 4. Float one's boat

Question ID : 26433072818  
Status : Answered  
Chosen Option : 2

**Comprehension:**

Read the given passage and answer the questions that follow.

Key factors influencing subway air pollution will include station depth, date of construction, type of ventilation (natural/air conditioning), types of brakes (electromagnetic or conventional brake pads) and wheels (rubber or steel) used on the trains, train frequency and more recently the presence or absence of platform screen-door systems.

In particular, much subway particulate matter is sourced from moving train parts such as wheels and brake pads, as well as from the steel rails and power-supply materials, making the particles dominantly iron-containing.

To date, there is no clear epidemiological indication of abnormal health effects on underground workers and commuters. New York subway workers have been exposed to such air without significant observed impacts on their health, and no increased risk of lung cancer was found among subway train drivers in the Stockholm subway system.

But a note of caution is struck by the observations of scholars who found that employees working on the platforms of Stockholm underground, where PM concentrations were greatest, tended to have higher levels of risk markers for cardiovascular disease than ticket sellers and train drivers.

The dominantly ferrous particles are mixed with particles from a range of other sources, including rock ballast from the track, biological aerosols such as bacteria and viruses, and air from the outdoors, and driven through the tunnel system on turbulent air currents generated by the trains themselves and ventilation systems.

**SubQuestion No : 41****Q.41 What is the passage about?**

- Ans
- 1. Metro life and the subway facilities
  - 2. The benefits of subway life
  - 3. The risky life in the subways
  - 4. Pollution created by the railroad

**SubQuestion No : 42****Q.42 Inferring from passage, what is the most practical way of reducing the health risk of subway life?**

- Ans
- 1. Wearing face masks during journey
  - 2. Opting for other transportation modes
  - 3. Reducing subway commutation
  - 4. Generating ventilation systems

Status : Answered

Chosen Option : 4

**Comprehension:**

In the following passage, some words have been deleted. Read the passage carefully and select the most appropriate option to fill in each blank.

It is indeed (1) \_\_\_\_\_ to create an urban forest to control air pollution. It is like a child's play if (2) \_\_\_\_\_ awareness is created among people of all ages. Just (3) \_\_\_\_\_ a mango seed or a jackfruit seed into fertile ground or make seed bombs for the seed to sprout during rainy season. Authorities must take (4) \_\_\_\_\_ measures to ensure a part of the town or city is allocated to plant trees. This ensures the (5) \_\_\_\_\_ of adequate oxygen to people.

**SubQuestion No : 46**

**Q.46** Select the most appropriate option to fill in blank number 1.

- Ans
- 1. difficult
  - 2. impossible
  - 3. easy
  - 4. impractical
